

IN THE CLAIMS

Replace claims 25, 36, 46 and 51 as follows:

c1 25. (Amended) The tissue dispenser according to claim 21 wherein the dispenser includes a back portion, the fastener disposed on the back portion.

c2 36. (Amended) A tissue dispenser comprising a body forming a tissue dispenser station for containing facial tissues to be dispensed, and a tissue disposal station for receiving used tissues; the tissue dispenser station separated by a wall from the tissue disposal station and having a tissue dispensing orifice; the tissue disposal station having a tissue disposing orifice; and an elongated cord element affixed to the body and extending upwardly therefrom for suspending the body above floor level.

c3 46. (Amended) The method according to claim 40 wherein step B comprises adhering the dispenser to a vertical wall by a fastener disposed on a rear portion of the dispenser.

c4 51. (Amended) The method according to claim 40 wherein step A includes providing a tissue dispenser wherein the wall which separates the tissue disposal station from the tissue dispenser station is defined by a part of a body of the dispenser.

✓
Cancel claims 28, 30, 32-35 and 49 without prejudice or disclaimer.

Insert new claims 52-54 as follows:

CS 52. (New) The tissue dispenser according to claim 21 wherein the tissue disposal station overlies the tissue dispenser, and the tissue disposing orifice is disposed in the top portion of the dispenser; the dispenser including a back portion, with the fastener disposed on the back portion; wherein the dispenser station is enclosed except for the tissue dispensing orifice; and the tissue disposal station is enclosed except for the tissue disposing orifice, the tissue disposing orifice covered by a membrane.

53. (New) The method according to claim 40 wherein step B comprises mounting the dispenser on a vertical wall disposed within the shower stall.

54. (New) The method according to claim 40 wherein step B comprises mounting the dispenser with the tissue disposal station overlying the tissue dispenser station, and with the tissue dispensing orifice facing downwardly and the tissue disposing orifice facing upwardly; step B also comprising adhering the dispenser to a vertical wall by a fastener disposed on a rear portion of the dispenser.
